

GhostBed Mattress Content for Ashley Furniture

When Marc Werner was a little boy he was very afraid of ghosts. Later, when he was an adult and trying to figure out a name for his new mattress company, he remembered this fear and viola! The name “GhostBed” was born.

What Are GhostBed Mattresses?

GhostBed mattresses are manufactured by Nature’s Sleep Bedding Company and are manufactured in the United States and Canada.

The “flagship” mattress GhostBed is known for is a foam mattress. The base is made out of support foam and then gel-infused memory foam and perforated latex foam are layered on top of that.

There are also “hybrid” GhostBed mattresses that are made of foam and coil springs (like you’d find in a traditional mattress) that are individually wrapped to add extra protection and support.

GhostBed Mattresses work best for people who sleep on their backs and their stomach. In fact, it is one of the top-rated mattresses for these sleep styles! If you sleep on your side, don’t worry—you’ll also be very comfortable on a GhostBed mattress, especially if you have a good pillow to help provide some extra support.

What Types of GhostBed Mattresses does Ashley Sell?

Currently, Ashley sells three types of GhostBed Mattresses:

- GhostBed Elite Hybrid Innerspring and Memory Foam Mattress
- GhostBed Performance Hybrid Innerspring and Memory Foam Mattress
- GhostBed Chill Memory Foam Mattress

Prices range from \$799 to \$2265 depending on the size and type of mattress you need.

Ashley also sells two frames for the GhostBed mattress:

- GhostBed All in One Metal Foundation (\$339-\$435)
- GhostBed Adjustable Bed Frame and Power Base (\$949-\$2469)

You can even buy a GhostPillow (\$114.99).

All of these GhostBed products are available through the Ashley Furniture website.

These are not, of course, the only products that GhostBed makes! The company also makes a GhostBed Mattress protector and cover.

If you have a partner who is constantly moving or often sleep with a squirmy child or a pet, you might want to try the GhostBed Luxe mattress, because it “deadens” motion as it crosses the bed.

If you like to travel, you can also buy a 10-inch GhostBed RV Mattress for your camper!

[How are GhostBeds Different from Other Mattress Brands?](#)

First, GhostBeds are both soft and firm. The base layer of foam is very firm. The top layers of memory and latex foam, however, add some cushy softness to help even out that firmness. This makes it ideal for people who are light sleepers and/or those who prefer their mattresses be super cozy.

If the mattress itself isn't soft enough, GhostBed also makes a GhostBed mattress topper that you can use to add an extra layer of soft (and cooling!) foam.

Figuring out the best GhostBed mattress will depend on your sleep style and your budget. Thankfully, whatever your needs and budget, there is a GhostBed product that will be perfect for you.
